

Learning objectives Renal Cell Cancer 2019

- To extend the knowledge on how to follow a personalised approach and treat different forms of (metastatic and advanced) Renal Cell Cancer (RCC)
- To develop skills to use the best choice of treatment for Renal Cell Cancer (RCC), with special reference to efficacy and safety of the different therapies involved
- To understand the molecular basis of systemic targeted therapies for Renal Cell Cancer (RCC) and get familiar with their mode of action
- To identify and understand sequential lines of therapy
- To learn about updates in immunotherapy
